

SCIENTIFIC GAMES AND GERMANY'S LOTTO BADEN-WÜRTTEMBERG CELEBRATE LAUNCH OF SYMPHONY™ LOTTERY GAMING SYSTEMS TECHNOLOGY

New, Advanced Symphony System Positions Lotto Baden-Württemberg to Sustainably Grow Lottery Retail and Online Channels, Adapt Quickly to Evolving Market

LAS VEGAS and ATLANTA – December 21, 2020 – Scientific Games Corporation (NASDAQ: SGMS) (“Scientific Games” or the “Company”) announce the official “go live” of its latest generation, advanced *SYMPHONY* lottery gaming systems technology. The new gaming system is now powering Lotto Baden-Württemberg (or the “Lottery”) and its network of more than 3,000 licensed retailers in Stuttgart in southwest Germany. *SYMPHONY* positions the Lottery to drive sustainable growth in retail and online channels, and bring new lottery games and services to market. The new system is currently supporting Lotto Baden-Württemberg’s full line of lottery products including Lotto 6aus49, EuroJackpot, GlücksSpirale, KENO, TOTO, Oddset sports betting and a variety of instant games.

“As the first lottery worldwide to launch the latest generation *SYMPHONY* platform, we are leading the way for other lotteries in the industry to understand the importance of systems technology and third-party integration capabilities for future growth,” said Georg Wacker, Managing Director of Lotto Baden-Württemberg. “We are extremely pleased with our decision to continue collaborating with Scientific Games as our technology partner, and launch *SYMPHONY* as our next generation gaming system to support our retail and digital growth plans for the coming years.”

Scientific Games developed the new *SYMPHONY* lottery gaming platform with a self-contained systems architecture that securely and easily integrates existing technology infrastructure and third-party systems seamlessly across all product lines, expediting the lottery’s ability to respond to rapidly evolving consumer and retailer needs, and quickly bringing up new games and services to market in both retail and digital channels. This *SYMPHONY* implementation is our next generation solution built upon the modular architecture currently operational for Danske Spil and Norsk Tipping.

Pat McHugh, Lottery Group Chief Executive for Scientific Games said, “Lotto Baden-Württemberg has demonstrated their trust in Scientific Games’ cloud-based products and support from its world-class European lottery technology facility in Vienna, Austria. Lotto Baden-Württemberg and the Company’s technology teams worked throughout 2020 on the systems integration project, which was announced in January.

“We congratulate Lotto Baden-Württemberg on its decision to advance operations and be prepared for future challenges and positioned for sustainable growth,” said Matthias Muller, VP Strategic Sales & Marketing, International Lottery Accounts for Scientific Games, who helped lead the project.

“*SYMPHONY* is the right platform to support the Lottery’s strategic plans to shorten time to market for new products and services, integrate new gaming verticals, further develop retail and online channels, and integrate new technologies and partners. *SYMPHONY* supports all of these goals.”

State-owned Lotto Baden-Württemberg is the third largest of 16 German state lotteries and generates nearly €1 billion (Euro) in annual revenues, benefitting good causes including sports projects, art, cultural heritage preservation and other social programs.

Currently the largest lottery technology provider in Europe and the fastest growing in the U.S., Scientific Games is a provider to all 16 lotteries in Germany. The Company supplies games, technology and services to more than 150 lotteries in 50 countries, and sports betting solutions to 24 lotteries and numerous private operators.

Forward-Looking Statements

In this press release, Scientific Games makes "forward-looking statements" within the meaning of the U.S. Private Securities Litigation Reform Act of 1995. Forward-looking statements can be identified by words such as "will," "may," and "should." These statements are based upon management's current expectations, assumptions and estimates and are not guarantees of timing, future results or performance. Therefore, you should not rely on any of these forward-looking statements as predictions of future events. Actual results may differ materially from those contemplated in these statements due to a variety of risks, uncertainties and other factors, including those factors described in our filings with the Securities and Exchange Commission (the "SEC"), including Scientific Games' current reports on Form 8-K, quarterly reports on Form 10-Q and its latest annual report on Form 10-K filed with the SEC on March 1, 2021 (including under the headings "Forward-Looking Statements" and "Risk Factors"). Forward-looking statements speak only as of the date they are made and, except for Scientific Games' ongoing obligations under the U.S. federal securities laws, Scientific Games undertakes no obligation to publicly update any forward-looking statements whether as a result of new information, future events or otherwise.
